1. Types of market

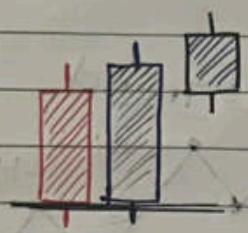

HH - Higher highs LH - Lower highs
HL - Higher lows LL - Lower lows.

2. Support / Resistance

Page No.
Date

1) **Support :-** When First cande is Red and Second Green.

support

Pull back

Always up ↑

2) **Resistance :-** When 1st candle is Green and second Red.

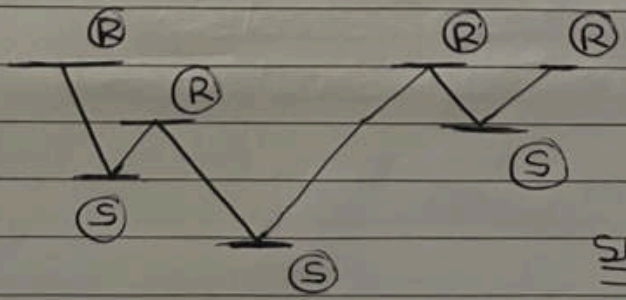

Resistance

Rejection

support

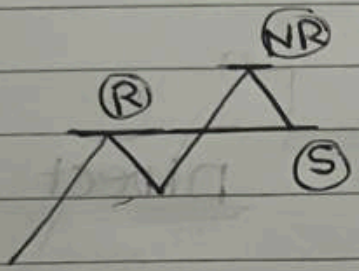

Always down ↓

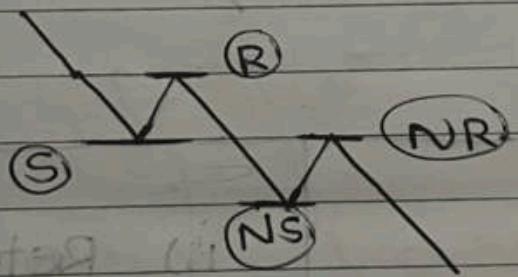

Resistance Level

Support level

- Resistance breakcaut

- Support breakcaut

3. Breakout

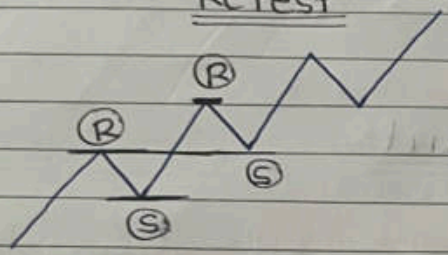

Page No.
Date

4.

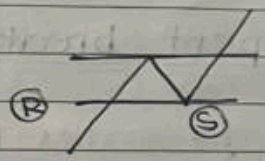

① Right breakaut – i) Direct breakaut
ii) Retest breakaut

② False breakaut

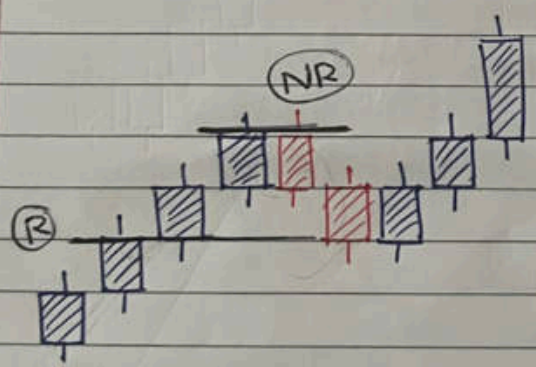

Retest

Direct

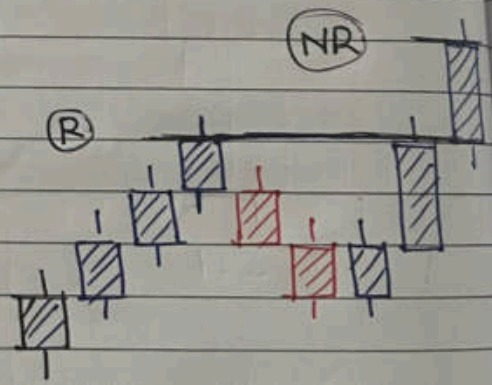

i) Direct

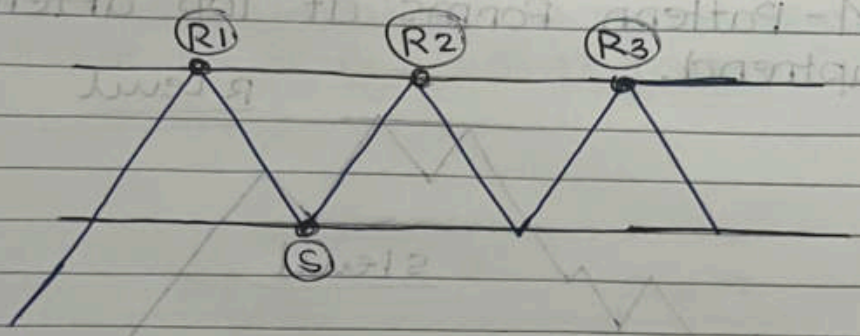

- When market breakaut (R) less than 3 candles then it retest (OR) and make a new (S) to continue uptrend.

ii) Retest

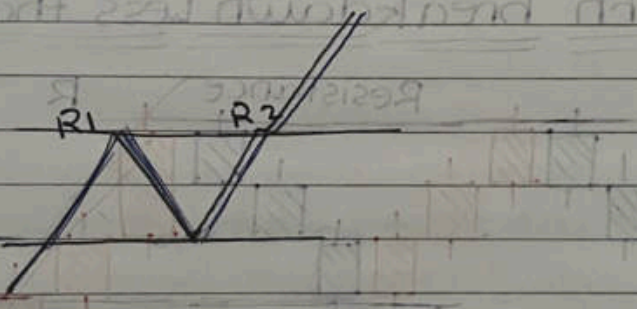

- When market is trying to breakaut (R) in more than 3 candle then it face a rejection and and form (S) and contin uptrend.

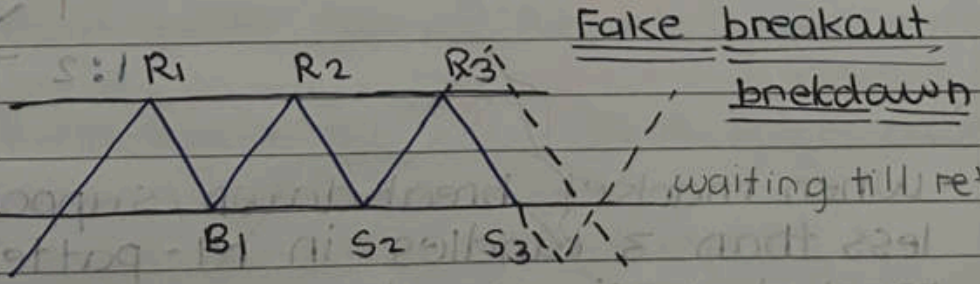

4. Breakaut in Sideways

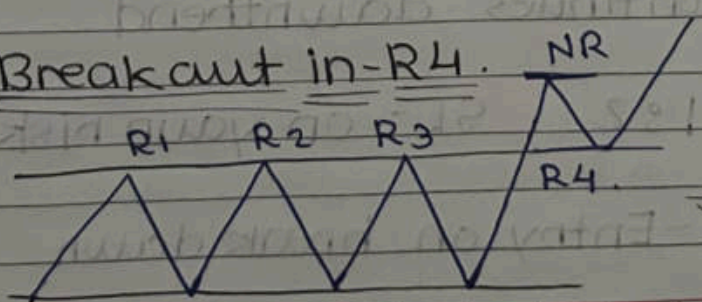

i) Breakaut in-R2

ii) Breakaut in-R3 / Breakdaun in-R3

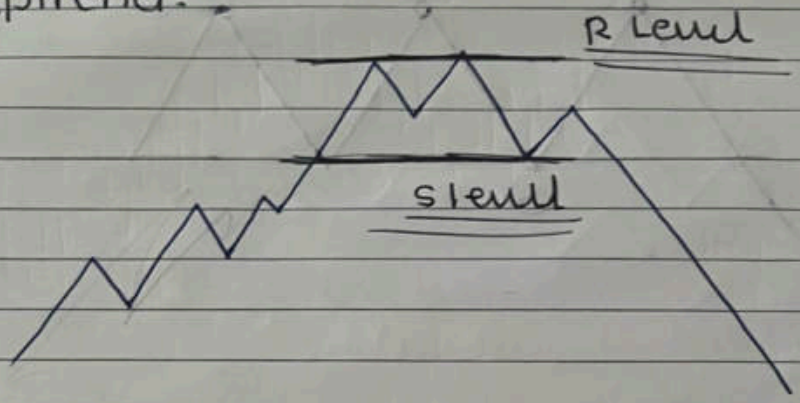

iii) Breakaut in-R4.

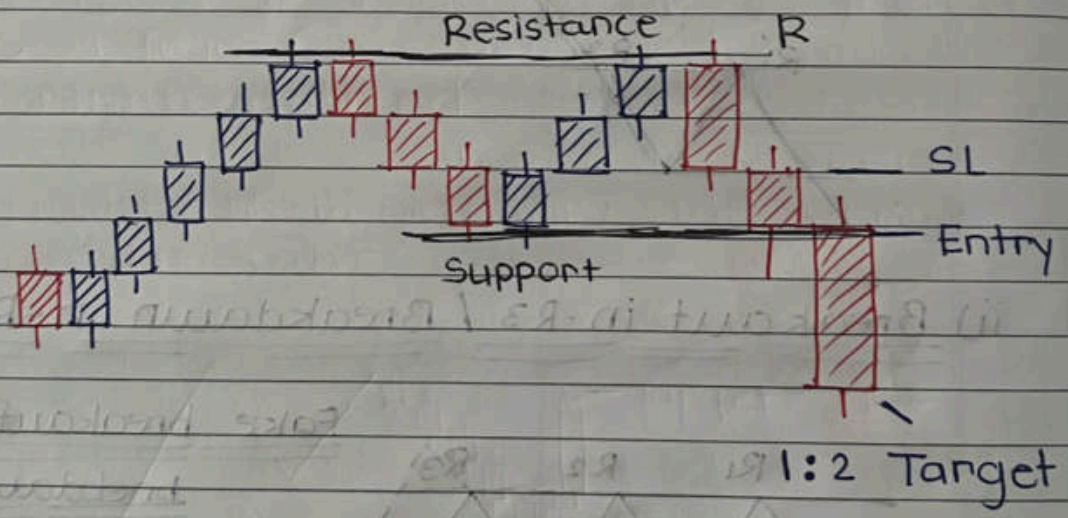

Right breakaut

5. M- Pattern

- M-Pattern forms at Top after a long uptrend.

- M- Pattern breakdawn less than 3 candle

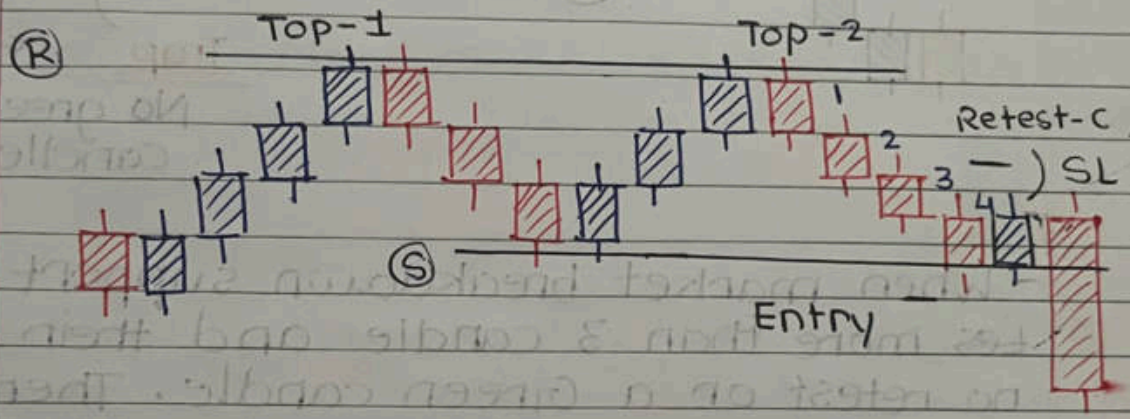

- When market breakdawn support in less than 3 candles in M-pattern, then market continues dawntrend.

- Target - 1:2 SL - on your risk.

- Entry on break dawn

- M-Pattern breakdown more than 3 candle — Retest breakdown

1:2 Target—

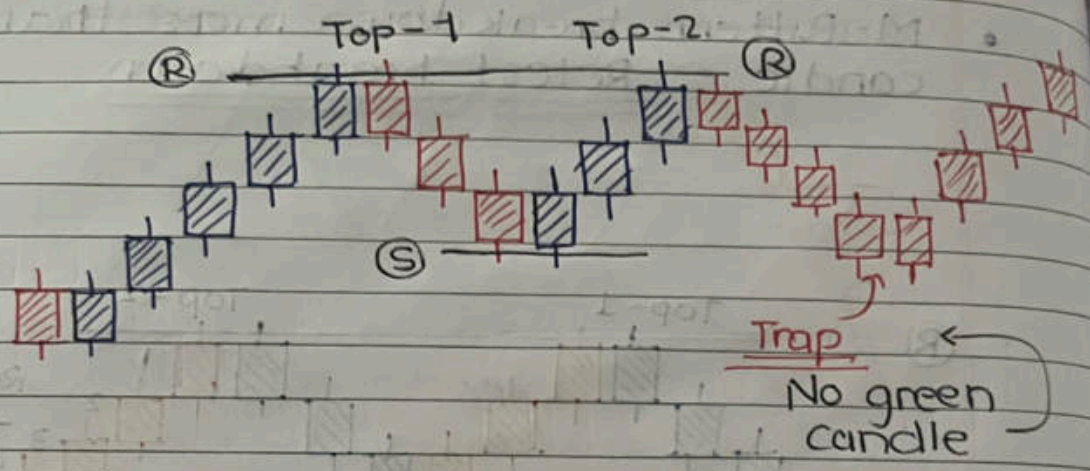

- When market breakdown support in more than 3 candles in m-pattern, then it retest by forming Green candle and continue downtrend.

Entry - on top of Retest Green candle

Target - 1:2. SL : Risk own.

Target - on previous support

6. # Fake-Breakaut In M-Pattern

- When market breakdown support in ~~Les~~ more than 3 candle and their is no retest or a Green candle. Then it is a Trap for sellers and market can continue uptrend.

② How to trade on buy side in M-pattern Fake breakaut?

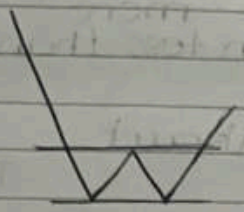

→

Target - 1:2

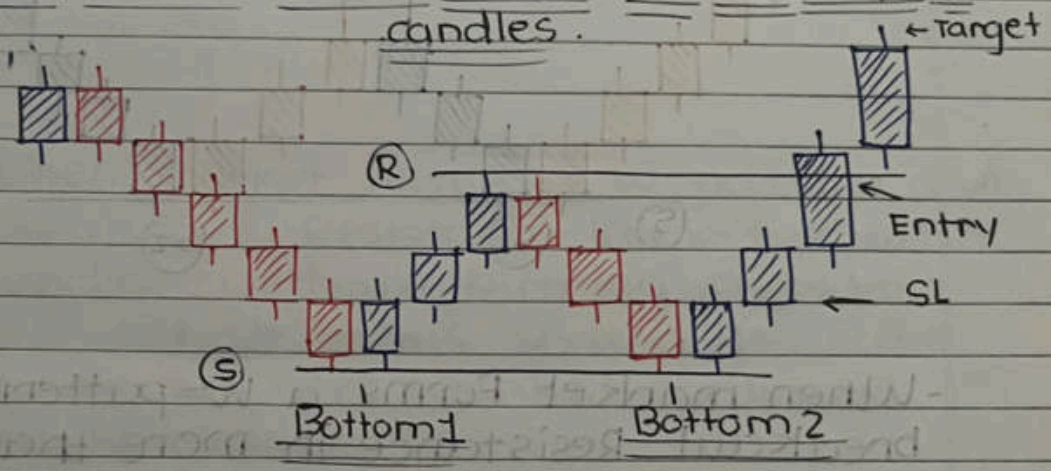

- in Fake breakdown buy on new support.

7. W-Pattern

- When market makes sudden down move -ment W- pattern is Form.

- W- Pattern breakaut in less than 3 candles.

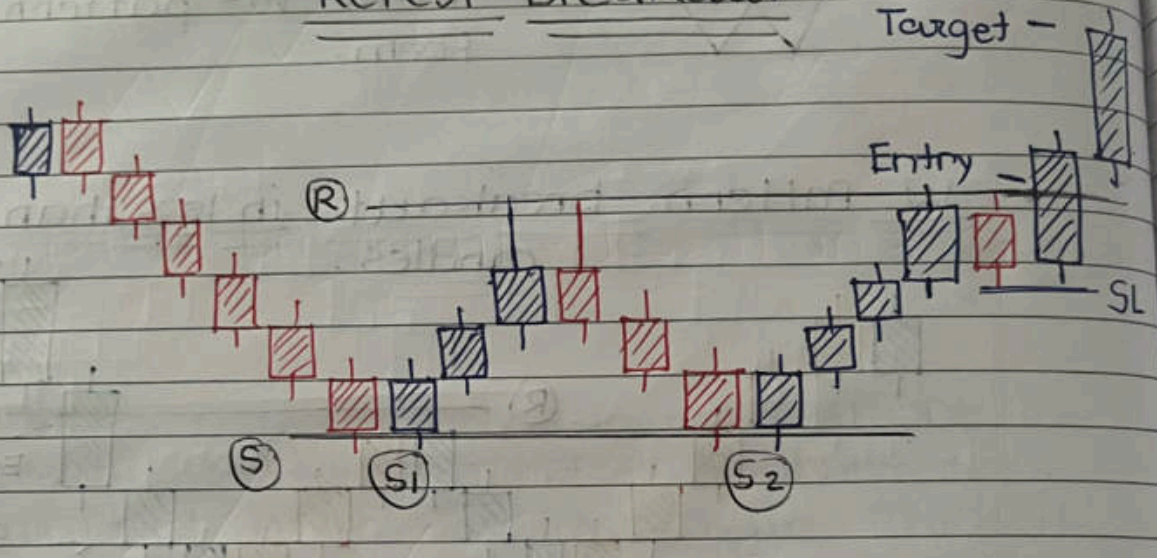

When market form w-pattern on does a breakaut in less than 3 candle then market continue a uptrend.

Entry - on breakaut Target :- 1 : 2
SL - On own risk

- W-Pattern / Breakout in ~~less than~~ more than 3 candles

Retest Breakout

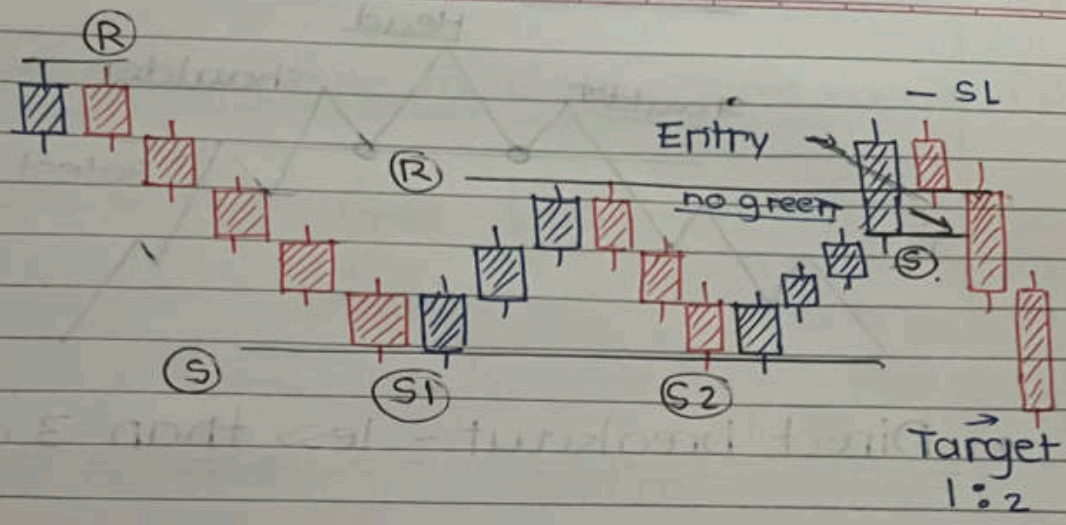

- When market forms a W-pattern and breakout Resistance in more than 3 candles then market Retest while making a red candle and continue uptrend.

Target - 1:2 SL - on own risk

Entry - on Red candle closing.

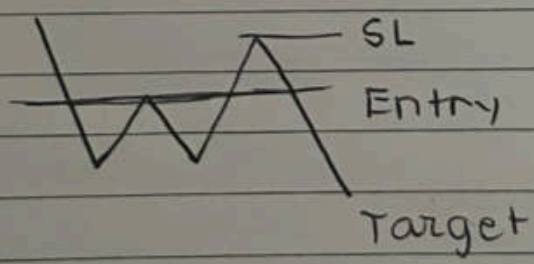

8. Fake-breakout In W.

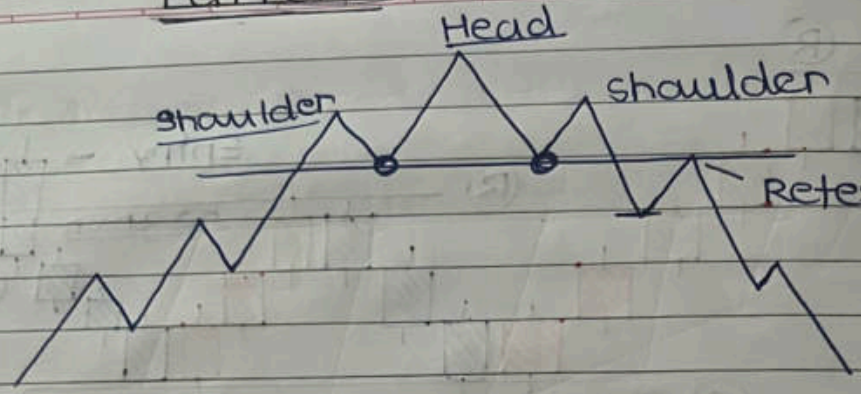

When market forms a W-pattern and breakaut Resistance in more than 3 candles withaut forming a retest red candle - This shauld be fake breakaut and market continues downtrend.

Target :- 1:2 SL - Risk awn.

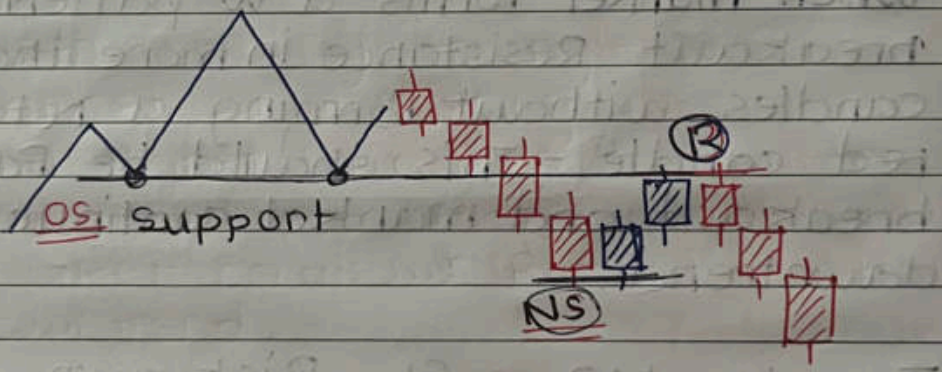

Entry - on top of Red candle.

9. Head and Shoulder Pattern

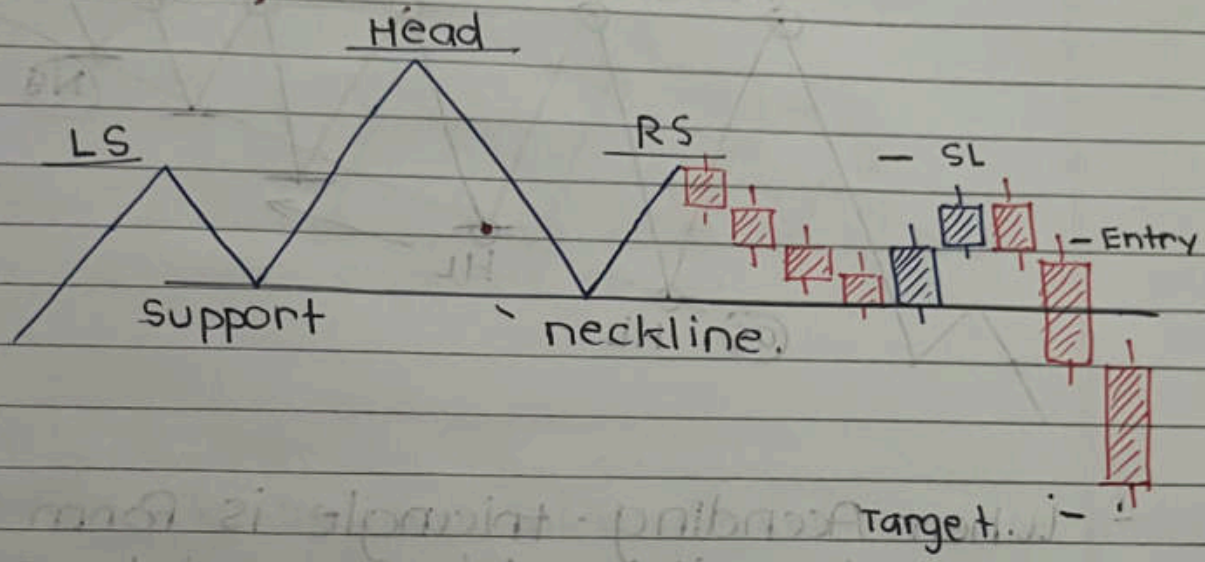

- Direct breakaut - less than 3 candles.

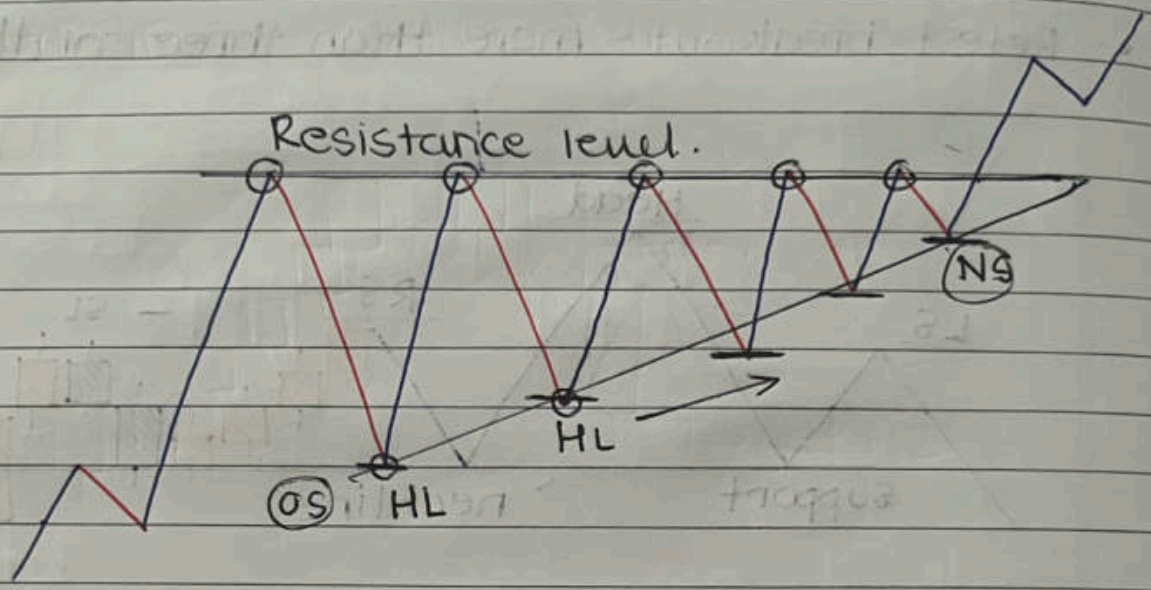

- When market form head and shaulder pattern and breakdawn support level in less than 3 candles then market Retest with 1-2 green candles and continue dawntrend.

- Retest breakout - more than three candles (3)

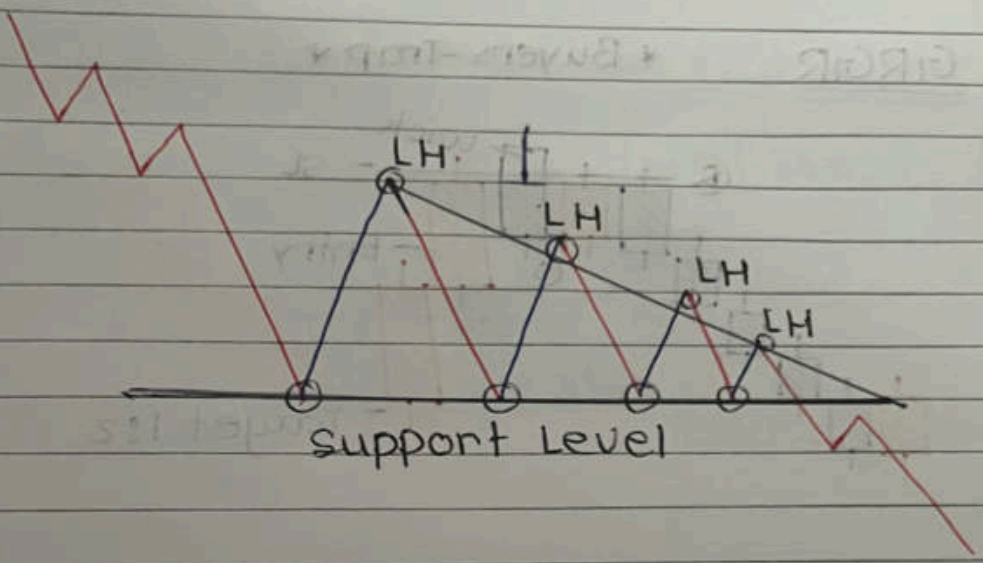

- When market form head and shaulder pattern and breakdawn, don't support level in more than 3 candles then market makes 2 or 1 Retest green candles then again market breakdawn previau support and can continue dawntrend.

10. Ascending Triangle.

- When Acending - triangle is form in market while making a resistance level. and Higher Law formation after some time Resistance become weak and finally market breakout (R) and continue downtrend.

11. Dscending Triangle

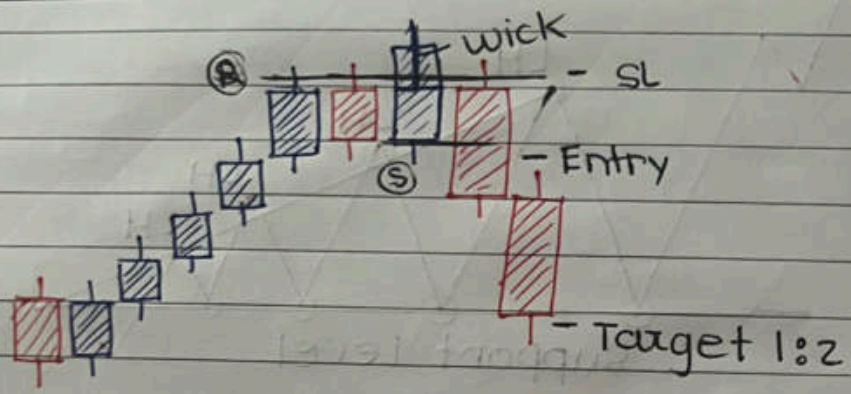

- When Decending - Triangle form in market while making support Level and Lawer High formation 'after sometime support became weak and finally breakdawn then market continues dawntrend.

12. Bull-Trap Strategy

Page No.
Date

- GRGR * Buyers-Trap *

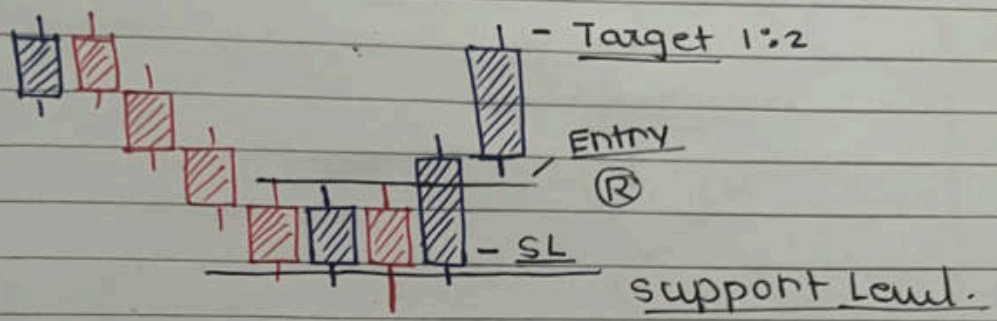

- When market is in uptrend it makes a Red candle and again make green candle whose wick breaks (R) and next candle form is red who breakdown previous support, then market continue downtrend.

13. Bear-trap Strategy

Page No.
Date

- RG RG. * seller's-trap *

- When market is in downtrend it makes 1R-1G-2R-G candles and second red candle wick breaks the support and anext green candle breaks the ® then market Trap seller and continue uptrend.

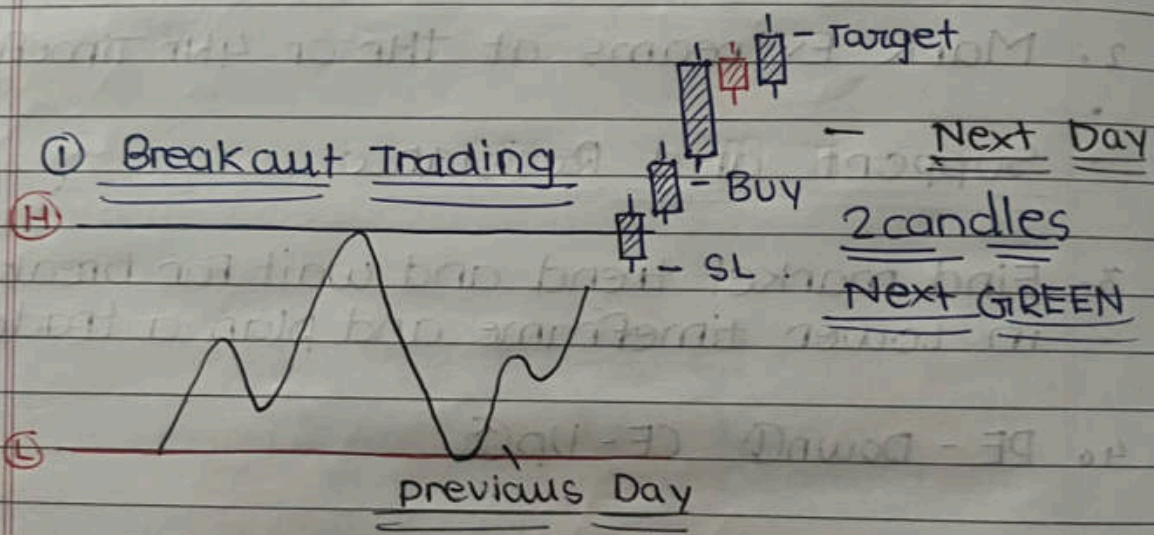

- Market does fast movement in this trap to hit SL of sellers fast.

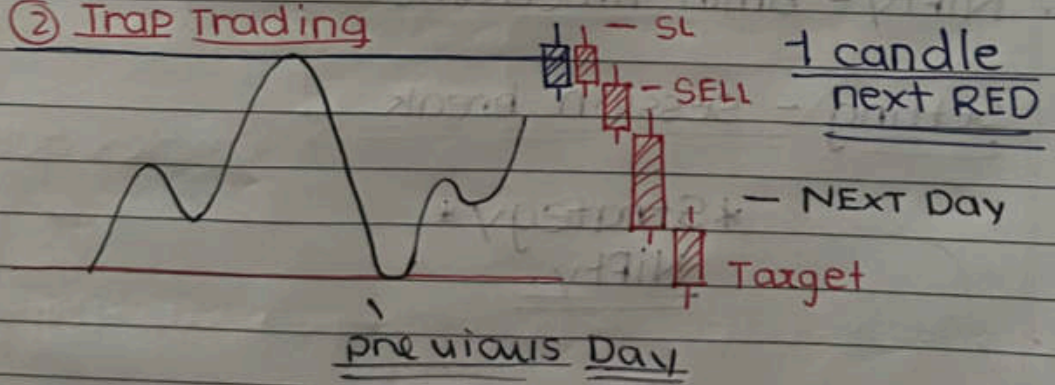

3. NIFTY-50 Strategy.

Page No.
Date

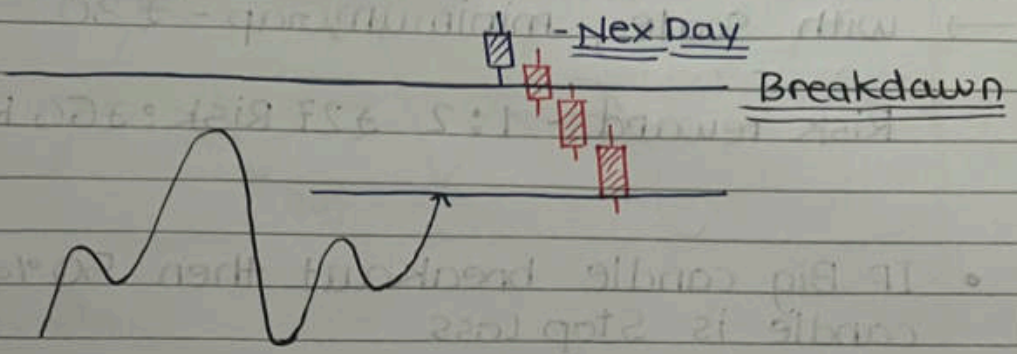

① Mark High and Low of previous Day candle
- Breakaut 2 candles.
- Trap Trading.

② Gap Fill.

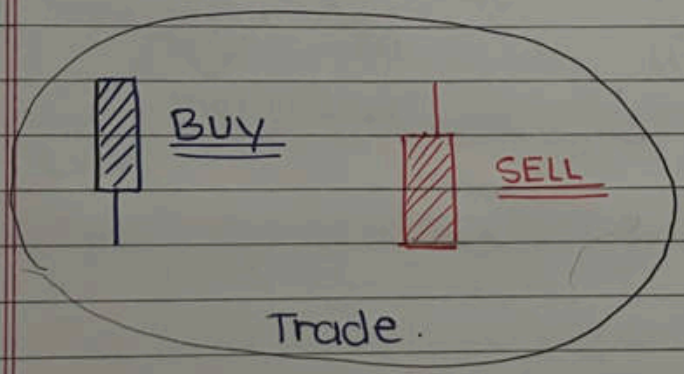

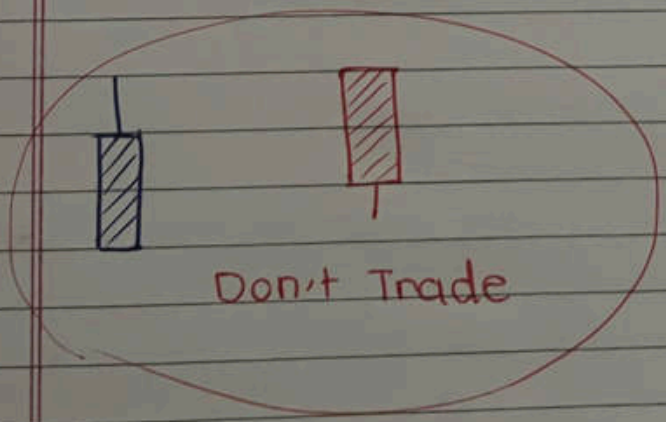

③ Gap Fill

previous Day

Trade.

Don't Trade

wait Till next candle.

? How to check Gap?

→ with scale, minimum Gap - ₹30

Risk reward - 1:2 ₹27 Risk : ₹60 Reward.

- If Big candle breakout then 50% of candle is Stop Loss.
- If Breakout is After 1 PM Then NO Trade.

Nifty, Gold, Bitcoin and other's

5. Trendlines Secreate

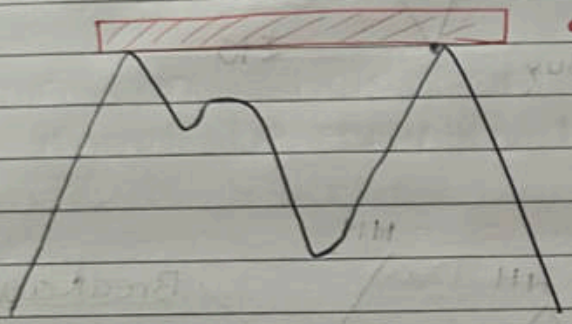

Page No.
Date

1. use parallel channel to draw a Trendline

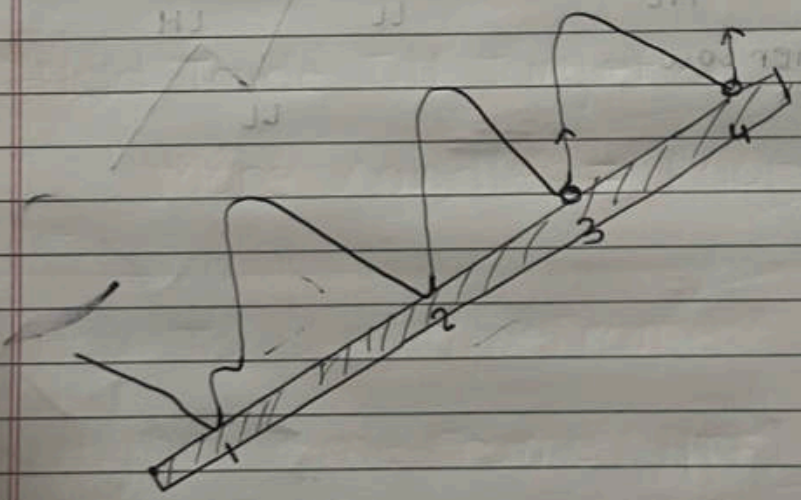

Buy at 5min

Timeframe – 15min

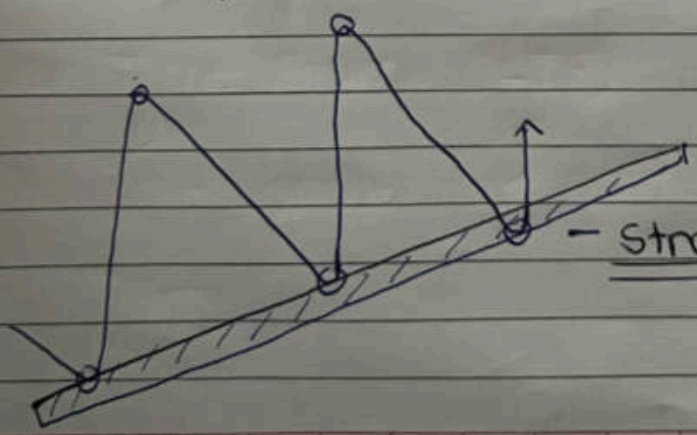

For View

• This is not a Trendline.

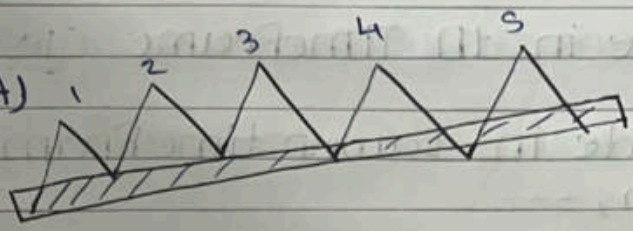

2. Thind 3rd point activates the trendline.

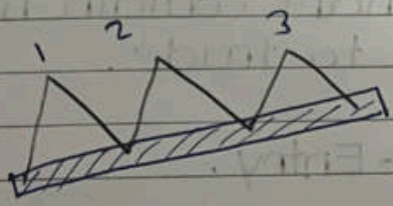

Trap- Trading

– Stronge

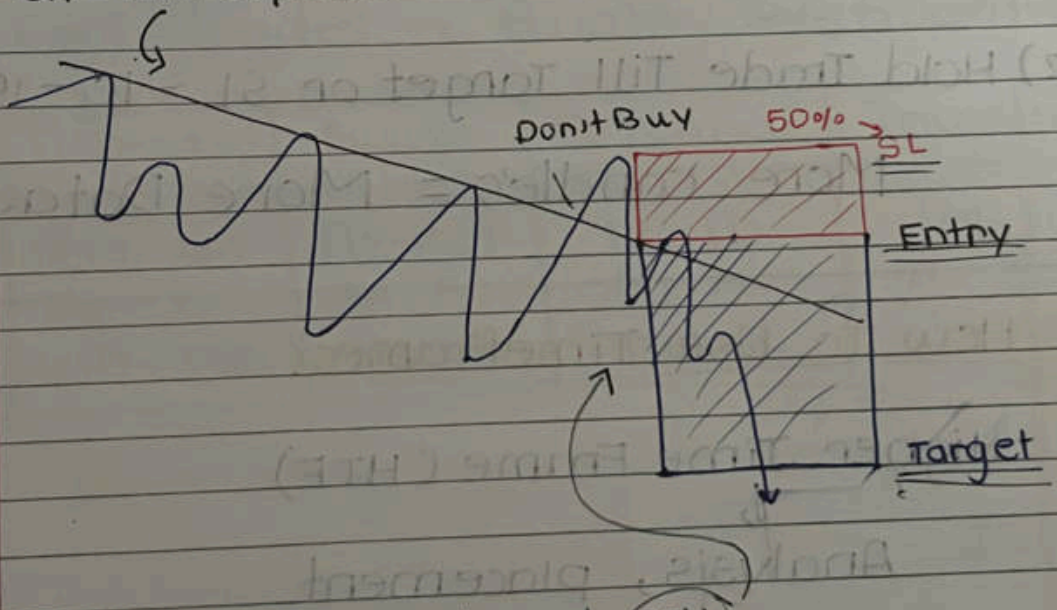

A) 

- Weak

B) 

- Stronge.

3. From Any paint draw. But Entry at thirdpoint on 5min Timeframe.

4. Wait For Retest and SELL.

6. Timeframe.

Page No.
Date

1- Can't trade in 1D Timeframe. (less candles)

2- Always trade in Lower timeframe like - 5min, 15 min, ---

3- 5min candlestick chart contain more data. So, it will be easy to trade.

4- Trade starts after - Entry.

---

1) Plan Trade :- 15 - 20 - 25 candles

2) Hold Trade Till Target or SL - 10 - 15 candles

More candle's = More Data.

? How To Use Timeframes?

1. Higher Time Frame (HTF)
   ↓
   Analysis, placement.

2. Lower Time Frame (LTF)
   ↓
   Action - Candlestick pattern

Less is More

Page No.
Date

- Use 15minutes timeFrame for analysis.
- Use 5 minutes timeFrame for Action
- 1minute give too much data-avoid it

creates confusion

↓

Over Trading.

- Get Trades → Quality >>> Quantity

Intraday	Swing	Potential	Investment
15M-5M	1H-15M	1W-1D	1M-1W
An - Ac	An - Ac	An - Ac	An - Ac.
Hold - Min	Hours	1week	Months

7. Backtesting.

1) Make a Trading Journal.
2) Write all thing about Trade.
3) Use this Data for Next Trade.

10. PSYCOLOGY

Page No.
Date

1. Practice in small capital account.
2. ₹5000 to ₹100000 is not possible.
3. Big capital is required to earn money.
4. Patience is very important.
5. Don't be distract from influencers.
6. Trade Max 2 Times a day even its Loss.
7. Overthinking - Be on your desisions.
8. Be on Target and SL.
9. Market is illusion.
10. Control your emontions.
11. Workout is Important.
12. Focus on Process not on profit.
13. Learn to except Losses.
14. Focus on skill.
15. Never repeat a mistake.

11.

12. Risk Management:

Page No.
Date

- **Risk 2 Reward**

- Minimum - 1:1
- Average - 1:2.

- **Risk per trade.**

Win rate - 50% 5 profit 5 loss

No - problem

- After 8 trades ⇒ streak of 3 Losses
- After 16 trades ⇒ streak of 4 Losses.
- After 32 trades ⇒ streak of 5 Losses.
- RPT can't be more than 3 percent.
- 2 SL Day over.

₹5000 - Risk ₹150 Reward - ₹300

- Position sizing = Quantity.

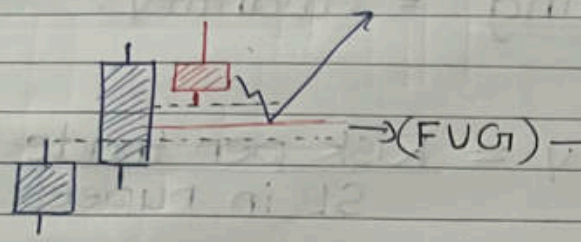

$$\text{Quantity} = \frac{\text{Risk per trade}}{\text{SL in rupees}}.$$

$$= \frac{₹150}{₹2} =$$

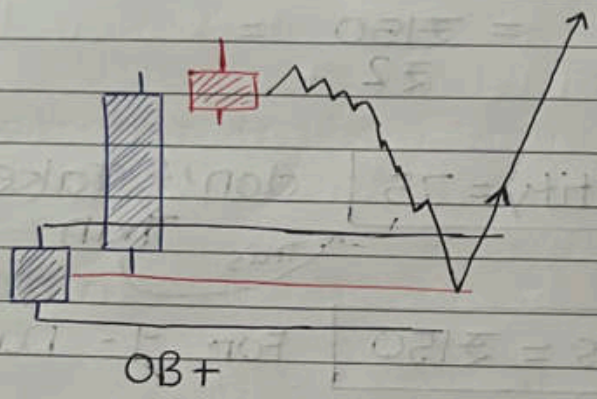

Quantity = 75 don't Take more Than this.

Max Loss = ₹150 For 1- Day.

13. Order BLOCK & (FVG) Fair value GAP

Don't works sometimes

Assets:
① Gold
② Currency
③ Crued oil.

① Mark 50 % of order block and wait till price touches it or trap it ; Then you can plan a trade with 1:2 Risk reward Ratio or more.

② On any timeFrame.

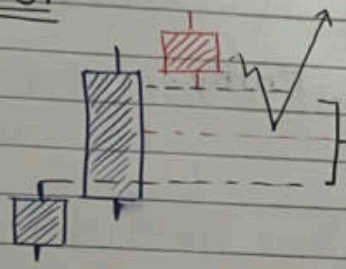

③ It didn't happens daily, but 2-3 time a week

④ It gives good quality trades.

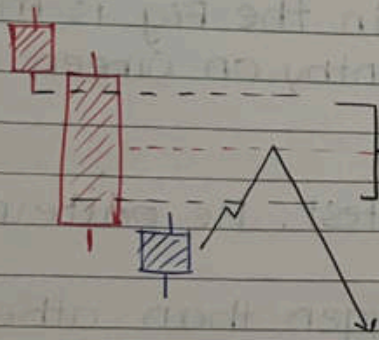

⑤ Don't use it in crypto. xxx

Page No.
Date

① FVG

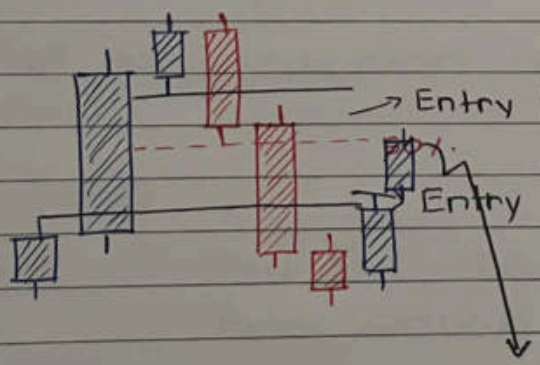

This Gap is called FVG.

FVG

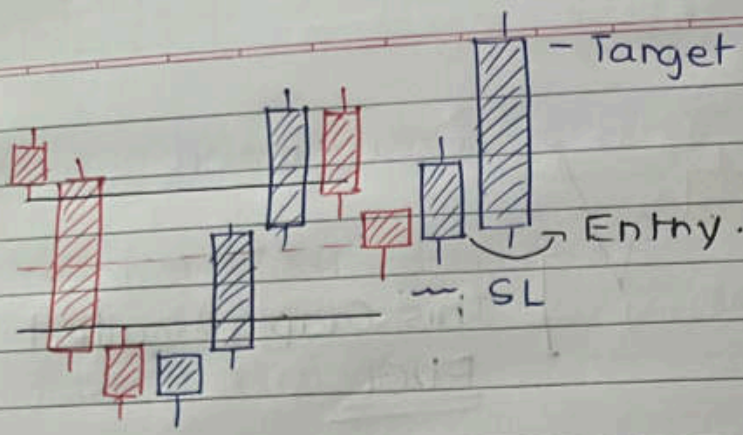

② Inverse FVG

Entry law quality

Entry high Quality.

- If Market breaks FVG then wait for Retest and Short when Retest.

① IF pattern shown in the Fig is made by market, then Do Entry on Green candle.

② Always wait For Retest. Be paiteint.

③ Middle candle bigger than ather 2.

④ And always draw 50 %.

14. # VWAP-PIOVOTS.

Page No.
Date

① For Intraday. - TimeFrame 5minutes.

② Search PIVOTS indicator and select standard - PIVOT.

③ Golden lines will appeares

④ Go to setting and change type to Fibonacci.

⑤ And set PIVOTS TimeFrame to daily.

VWAP - Valume wieghted average price.

Stockhastic RSI

① Add all 3 indicators at 10:45 in any stock.

- RSI - Blue RSI should cut Red. Entry signal.

16. NIFTY-50 STRATEGY

Page No.
Date

- Open Range breakaut (ORB) + Trend confirmation.

= Concept : First 15-30 minutes defines direction + liquidity. were Big players actives.

= Setup :-

- Timeframe : 5min
- Instument : Nifty 50 / Nifty Futures.
- Indicators : • 20 EMA (trend)
  • VWAP (institutionat avg. p)

= Rules : 1. Mark opening Range.

- 9:15 to 9:30 ka high and law mark kare.

2. Entry Conditions.

- **Buy :**

- Price break high opening.
- Price above VWAP + 20 EMA
- Candle closes strong (no weak breakaut)

- **Sell :**

- price breaks opening law
- Price belaw VWAP + 20 EMA.
- Stong bearish candle close.

3. Stop Loss :

- opposite sides of opening range. (tight and logical SL)

4. Target

- Risk : Reward = 1 : 2 minimum.
- OR trail using VWAP / previaus candle.

5. Avoid Trades:

- No trade if :
  - Range too small (low volatility)
  - News/event day (sudden spikes)
  - Fake breakout (wick only, no close)

This is what actually makes it Profitable:

- Only 1-2 trades per day.
- No Revenge trading.
- Risk only 1-2 % capital per trade.
- Maintain a trading journal.

* Reality check *

- Gives losses some days.
- Works better in trending days.
- Fail in sideways market.

That's why pro's focus more on:

→ Risk Management.

→ Discipline

→ Consistancy.

WHAT IS A STRONG CANDLE ?

Page No.
Date

- A strong bullish / beanish candle shaw's clear dominance of buyer's or sellers - no confusion, no hesitation.

- **Strong Bullish Candle** (Buy Pawer)

- Big body (large green candle)
- very small or no upper / lawer wick.
- Closes near the high.
- Breaks a previous resistance / high
- Valume is high (if you use valume)

Note :- **Meaning** : Buyers are in full control. institution are likely push -ing price up.

Page No.
Date

Strong Bearish Candle (Sell Power)

- Big red body
- Very small wicks.
- Closes near low
- Breaks support / previous low
- High a volume.

Note:- Meaning : Seller are dominating agressively.

WEAK CANDLES.

Page No.
Date

- Long wick (rejection both sides)
- Small body (indecision)
- Doji type candles.
- Breakout without strong close.

= This Traps Beginners.

- **TRICK :-**

Ask yourself 3 questions.:

1. Did it Break structure? (High / Low)
2. Did it close strong? (Near extream)
3. Is there momentum? (Size bigger than previous candle)

If all 3 = Yes → High probability move.

- **It Works Best** (Very Important)

Strong candles matter more when :-

- At breakout levels.
- Near VWAP / support - Resistance,
- During market open's (9:15 - 10:30 For Nifty-50)

A single strong candle ≠ Guaranteed profit.

Best Trader waits for :

- Strong candle + Confirmation (Next candle or Retest)

17. Supply & Demand.

Page No.
Date

- Mark This Levels on 15 mins. TimeFrame
- Day high and Day low bhi mark krna hai
- Mark swing high's and law's.
